

# RRC-IO/001

Remote I/O unit with CANopen DS 401 protocol

- **16 × digital input 24 V DC without GS\*)**
- **8 × digital output 24 V DC without GS**
- **Supplying voltage measuring**
- **1 × CAN with GS, chained connectors**
- **Power supply 24 V DC**
- **Design meets the EN 50155 standard**

## TECHNICAL DATA

|                                |                                     |
|--------------------------------|-------------------------------------|
| <b>Digital inputs</b>          | 16 × 24 V DC                        |
| Input voltage maximum range    | ± 40 V DC                           |
| <b>Digital outputs (MOS)</b>   | 8 × 24 V DC                         |
| Switched current               | Max. 4 A/output                     |
| Shortcut protection            | Yes                                 |
| Polarity reversal protection   | Yes                                 |
| <b>CAN interface</b>           | 1 ×                                 |
| Communication protocol         | CANopen DS 401                      |
| Terminating resistor           | External                            |
| Galvanic separation            | Yes **)                             |
| CAN interface connection       | 2 × CANON 9 (chaining)              |
| Configuration                  | By RRC-KM module                    |
| Supplying voltage              | 24 V DC -30 to +25 %                |
| Maximum power consumption ***) | 100 mA at 24 V DC                   |
| Operating temperature          | -40 to +70 °C                       |
| Storage temperature            | -40 to +70 °C                       |
| Maximum ambient humidity       | < 95 % non-condensing               |
| I/O signal connection          | WAGO X-COM 769 (5,08 mm) connectors |
| Mounting form                  | DIN 35 mm rail mounting             |
| Cover protection rate          | IP30                                |
| Dimensions (w × h × d)         | 170 × 100 × 108 mm                  |
| Weight                         | 1250 g                              |

\*) Galvanic separation.

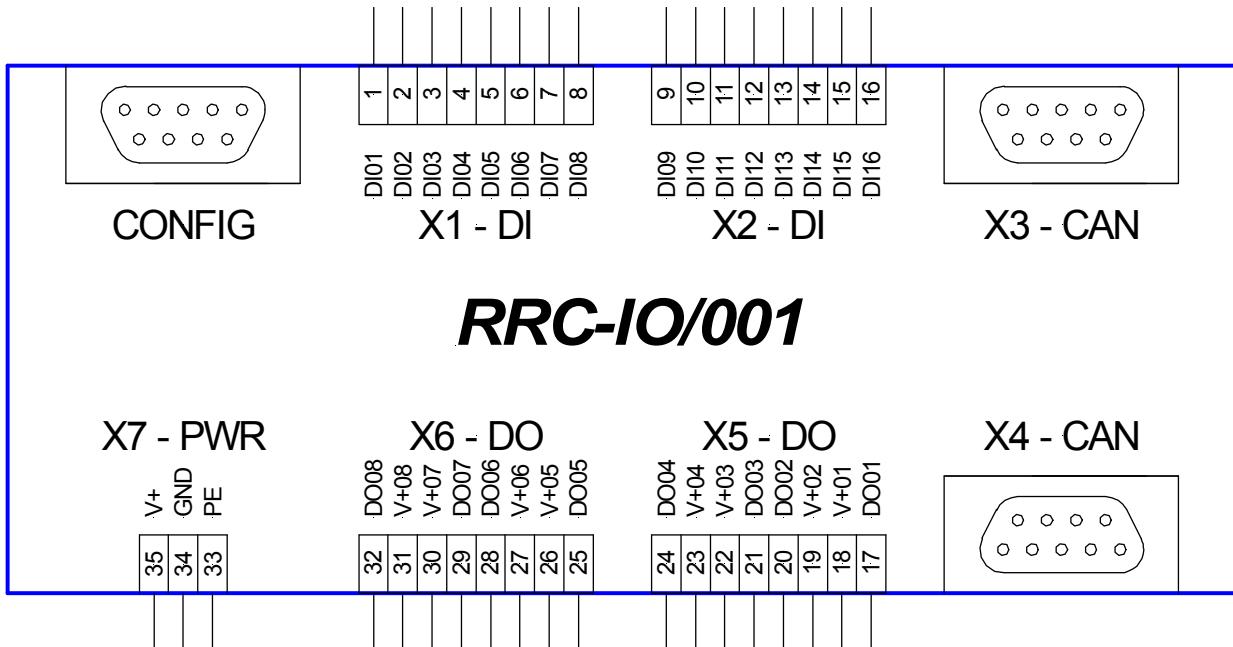

\*\*) Isolation strength of galvanic separation 600 V AC/1 min. Isolation may not be used for dangerous voltage separation.

\*\*\*) Without inputs/outputs.

## ORDERING INFORMATIONS

|            |  |
|------------|--|
| RRC-IO/001 | Remote I/O unit with CANopen DS 401 protocol, warranty certificate, operation instructions |
| RRC-KM     | Configuration module, warranty certificate, datasheet                                      |

## RECOMMENDED DRAWING SYMBOL

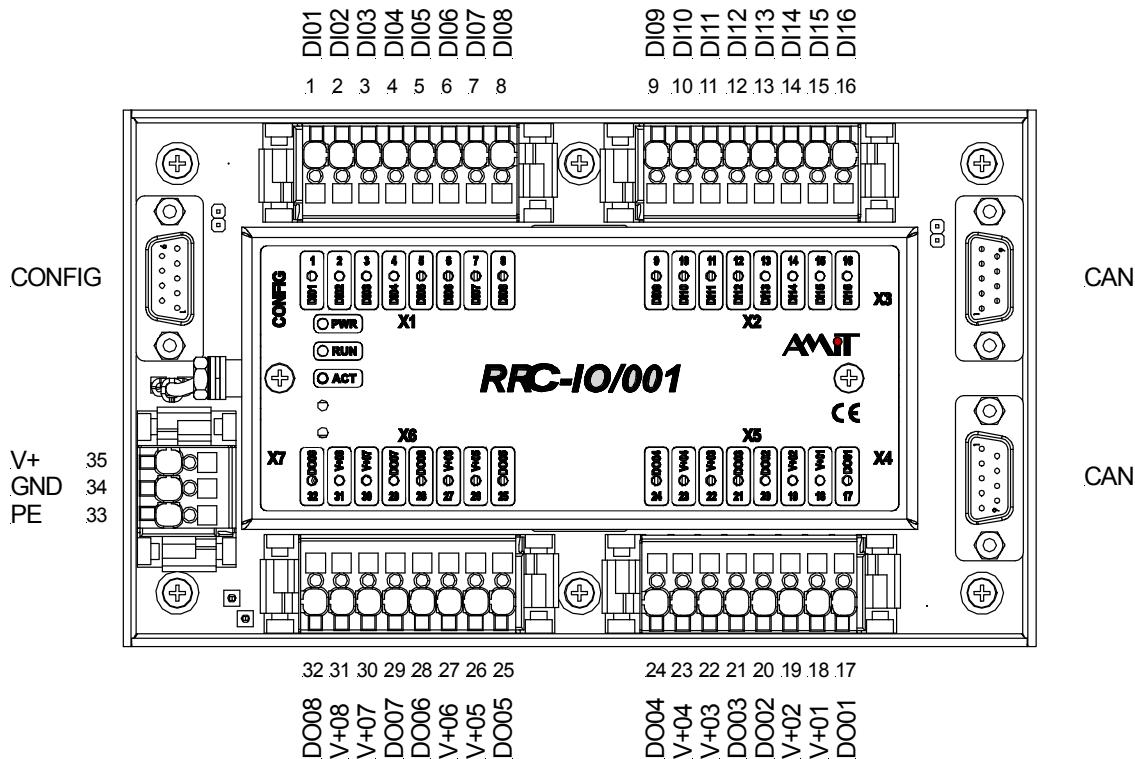

### TERMINALS IDENTIFICATION

| Terminal | Connector | Label       | Meaning                                    |
|----------|-----------|-------------|--|
| 1 to 16  | X1, X2    | DI1 to DI16 | Digital input without galvanic separation  |
| 17       |           | DO01        | Digital output without galvanic separation |
| 18       |           | V+01        | Supplying of DO01 output                   |
| 19       |           | V+02        | Supplying of DO02 output                   |
| 20       |           | DO02        | Digital output without galvanic separation |
| 21       |           | DO03        | Digital output without galvanic separation |
| 22       |           | V+03        | Supplying of DO03 output                   |
| 23       |           | V+04        | Supplying of DO04 output                   |
| 24       |           | DO04        | Digital output without galvanic separation |
| 25       |           | DO05        | Digital output without galvanic separation |
| 26       | X6        | V+05        | Supplying of DO05 output                   |
| 27       |           | V+06        | Supplying of DO06 output                   |
| 28       |           | DO06        | Digital output without galvanic separation |
| 29       |           | DO07        | Digital output without galvanic separation |
| 30       |           | V+07        | Supplying of DO07 output                   |
| 31       |           | V+08        | Supplying of DO08 output                   |
| 32       |           | DO08        | Digital output without galvanic separation |
| 33       | X7        | PE          | Module chassis                             |
| 34       |           | GND         | Power supply GND                           |
| 35       |           | V+          | Power supply 24 V DC                       |
